

April 29, 2009

To whom it may concern,

Tartu Observatory will actively participate in the joint program “Erasmus Mundus Joint Doctorate (EMJD) in Relativistic Astrophysics” as an European Institution Partner.

I am aware of its application.

The research and education required by the joint program will be carried out within the research, curriculum and doctorate program in Astrophysics and Cosmology, led by Dr. Enn Saar. The research activity of graduate and doctorate students of this program will be carried out in Cosmology Department in collaboration with Tartu University. Tartu Observatory will provide all the necessary support for this joint program.

Sincerely yours,

Dr. Laurits Leedjärv
Director
