Photon efficiency	Review
-------------------	--------

Other $J\psi\eta(\prime)$ - selections and fit
--

Absolute BRs (against $J\psi\phi 23\pi$)

η/η' mixing

Tagging studies

ϕ_s

- Today: almost final $J\psi\eta\pi^0\rho^0\gamma$ sel and fit + on-going photon eff study
- Next: sel & fit of other modes (all signal MC available)
- In parallel: tagging studies (relevant variables, perf. calibration modes, ML evolutions in FT group) and ϕ_s sensitivity studies (precision & stat). Complementary to time acceptance studies.
